CSX TRANSPORTATION, INC. RAILROAD BRIDGE IN HAZARD, KENTUCKY

Install New Parapet Wall for 3-Span Concrete Spandrel Arch Hazard, Kentucky (Wabaco Subdivision, Perry Co.)

This was a fast track project for CSX Transportation to remove and replace sections of the spandrel walls on a 3-span arch bridge. A tie rod and waler system was also installed to reinforce the walls. This project was necessary to permit coal to be shipped out of a nearby mine that had reopened.

Engineer: HDR Engineering, Inc.
